State	Summary
Alabama	High wind damage occurred across southern California near San Diego followed by 79 confirmed tornadoes during an outbreak across many southe including AL, FL, GA, LA, MS, SC and TX. This was the 3rd most tornadoes to occur in a single outbreak during a winter month (Dec.-Feb.) for records 1950.
Alabama	Large hail and high winds in Texas north of the Dallas metro region caused widespread damage to structures and vehicles. Severe storms also caused across several other states (OK, TN, KY, MS, AL) due to the combination of high winds, hail and tornadoes.
Alabama	Over 70 tornadoes developed during a widespread outbreak across many central and southern states causing significant damage. There was also wi straight-line wind and hail damage. This was the second largest tornado outbreak to occur early in 2017.
Alabama	Severe freeze heavily damaged fruit crops across several southeastern states (SC, GA, NC, TN, AL, MS, FL, KY, VA). Mid-March freezes are not climatol unusual in the Southeast, however many crops were blooming 3+ weeks early due to unusually warm temperatures during the preceding weeks. Dar severe in Georgia and South Carolina. Crops most impacted include peaches, blueberries, strawberries and apples, among others.
Arkansas	A period of heavy rainfall up to 15 inches over a multi-state region in the Midwest caused historic levels of flooding along many rivers. The flooding severe in Missouri. Arkansas and southern Illinois where levees were breached and towns were flooded. There was widespread damage to homes. bu
